

Project Goals

My Project goal is to have an interface easily accessible and contains all the information needed for my portfolio. On top right of my portfolio it should have the navigation option to fast travel across the portfolio.

Progress Summary

I have completed the background of my portfolio and some of its functions like the navigation where you can click some of the text to travel or reveal the information for an added display including the title, logo, description, and about information.

Screenshots and Explanations

This code represents the image above, the img is container for the image, and the UL, UI, is where the navigation is. For the text I used H1 to place the text inside.

This is the CSS code for the first part of my portfolio
It contains the background and the positioning of the
text and image.

This code corresponds to the about me part of my portfolio. As you can see some of it has the exact same code on the Previous one, the difference between them is that I added a Function for the navigation “Skills” and “Education” I wanted to be like clicking the text will reveal the inside text so it will not be crowded or beyond the size of my image. This is the last Part of my progress.
